DESCRIPTION

The project is being undertaken at the LIA buildings within the residential precinct in the south-west portion of the base. The RAAF Darwin LIA Refresh Project consists of 16 buildings, 15 of which are heritage listed, dating from 1940/1941 and examples of tropical type housing being modified to function as barracks and dormitories.

It is intended that this project will undertake internal and external refurbishment works in line with the Burra Charter in staged sections, following the current MFPE and the current Heritage Management Plan.

Refurbishment works include ceiling works, internal patching and painting works, replacement of and/or repairs to carpet, joinery, tiles, air-conditioning units, toilets, fittings and associated upgrade works.

HIGHLIGHTS

- ▶ Sympathetically restoring heritage buildings.
- ▶ Handing back buildings in a more habitable state.
- ▶ Engaging local Indigenous companies and workers on the project.

IMAGES (FROM TOP TO BOTTOM)

- ▶ Room refresh.
- ▶ Bathroom renovation.
- ▶ Structural column and footing replacement.
